

EXERCISE-1

Q1) Prompt for amount, interest rate and no. of years and calculate simple Interest.

A web-based Simple Interest Calculator interface. It features a white card with a light blue background. The title "Simple Interest Calculator" is centered at the top. Below the title, there are three input fields: "Principal Amount:" with the value "4000", "Rate of Interest:" with the value "8", and "Time In Years:" with the value "2". A black "Calculate" button is positioned at the bottom of the card.

Simple Interest Calculator

Principal Amount:

4000

Rate of Interest:

8

2

Calculate

The same Simple Interest Calculator interface as above, but with a dark gray modal overlay. The modal contains the text "127.0.0.1:5500 says" and "Simple Interest is: Rs.640". An "OK" button is located in the top right corner of the modal. The background interface is dimmed.

127.0.0.1:5500 says

Simple Interest is: Rs.640

OK

Principal Amount:

4000

Rate of Interest:

8

Time In Years:

2

Calculate

Q2)Is palindrome string

A screenshot of a web application titled "Palindrome Checker". The interface is clean and modern, with a light blue background. The title is centered at the top in a bold, dark font. Below the title, there is a label "Enter a string:" followed by a text input field. The input field contains the text "hello". Below the input field, there is a large, black, rectangular button with the word "Check" written in white, centered on it.

Q3)Area of circle

Area Calculator

Enter Radius:

Check

127.0.0.1:5500 says

Area of Circle is 201.06192982974676

OK

Enter Radius:

Check

Q4)Copy information of one object to another and log it to console.

Object Copy Demonstration

Original Object

Name: Lobster, Age: 22

Copied Object

Name: Lobster, Age: 22

Q5)Create a list of objects of Employee with info as follow :
a. Name, age, salary ,DOB

Employee Operations

Show All

Salary>5000

Group By Age

Increment Salary

Output

```
ALL EMPLOYEES [ { "name": "Amit", "age": 25, "salary": 6000, "dob": "1999-05-10" }, { "name": "Riya", "age": 22, "salary": 4000, "dob": "2002-03-15" }, { "name": "Karan", "age": 28, "salary": 8000, "dob": "1996-08-20" }, { "name": "Neha", "age": 21, "salary": 900, "dob": "2003-01-12" } ]
```

b. filter all employees with salary greater than 5000

Employee Operations

Show All

Salary>5000

Group By Age

Increment Salary

Output

```
EMPLOYEES WITH SALARY > 5000 [ { "name": "Amit", "age": 25, "salary": 6000, "dob": "1999-05-10" }, { "name": "Karan", "age": 28, "salary": 8000, "dob": "1996-08-20" } ]
```

c. group employee on the basis of their age

Employee Operations

Show All

Salary>5000

Group By Age

Increment Salary

Output

```
EMPLOYEES GROUPED BY AGE { "21": [ { "name": "Neha", "age": 21,
"salary": 900, "dob": "2003-01-12" } ], "22": [ { "name": "Riya", "age": 22,
"salary": 4000, "dob": "2002-03-15" } ], "25": [ { "name": "Amit", "age": 25,
"salary": 6000, "dob": "1999-05-10" } ], "28": [ { "name": "Karan", "age": 28,
"salary": 8000, "dob": "1996-08-20" } ] }
```

d. fetch employees with salary less than 1000 and age greater than 20.
Then give them an increment 5 times their salary.

Employee Operations

Show All

Salary>5000

Group By Age

Increment Salary

Output

```
Increment Salary 5x (salary<1000 & Age>20) [ { "name": "Neha", "age": 21,  
"salary": 4500, "dob": "2003-01-12" } ]
```
