

EXERCISE-1

Q1)- Create a simple React app that displays "Hello, World!" on the screen.

```
exercise-1 > src > Q1.jsx > ...  
1  function Hello(){  
2    return <h1>Hello, World!</h1>  
3  }  
4  
5  export default Hello;
```

React App:

Q2)- How to set up a React project and render a simple component.

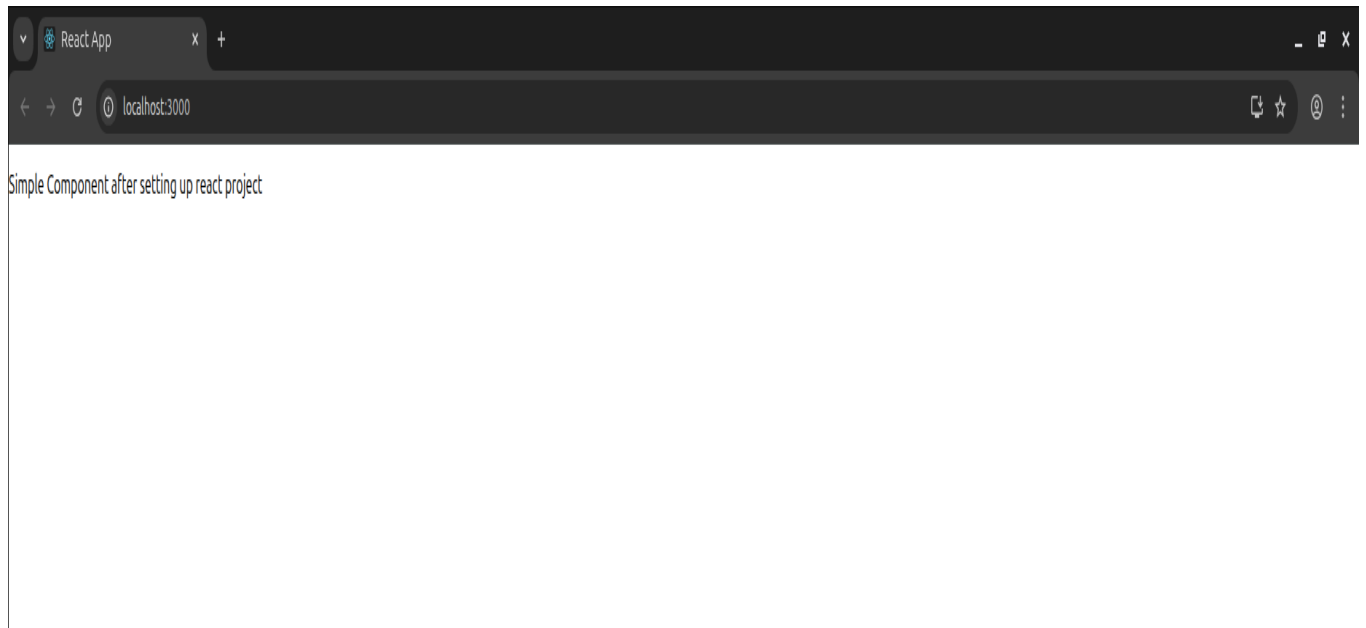

To set up a react project :

- Open your terminal and run `npx create-react-app first-react`
- Cd first-react
- Npm start

Code to render a simple component:

```
exercise-1 > src > Q2.jsx > default
1  function SimpleComp(){
2      return <p>Simple Component after setting up react project</p>
3  }
4
5  export default SimpleComp;
```

React App:

Q3)- Write a functional component that displays the text "Functional Component" and a class component that displays the text "Class Component". Then render both components in the App component.

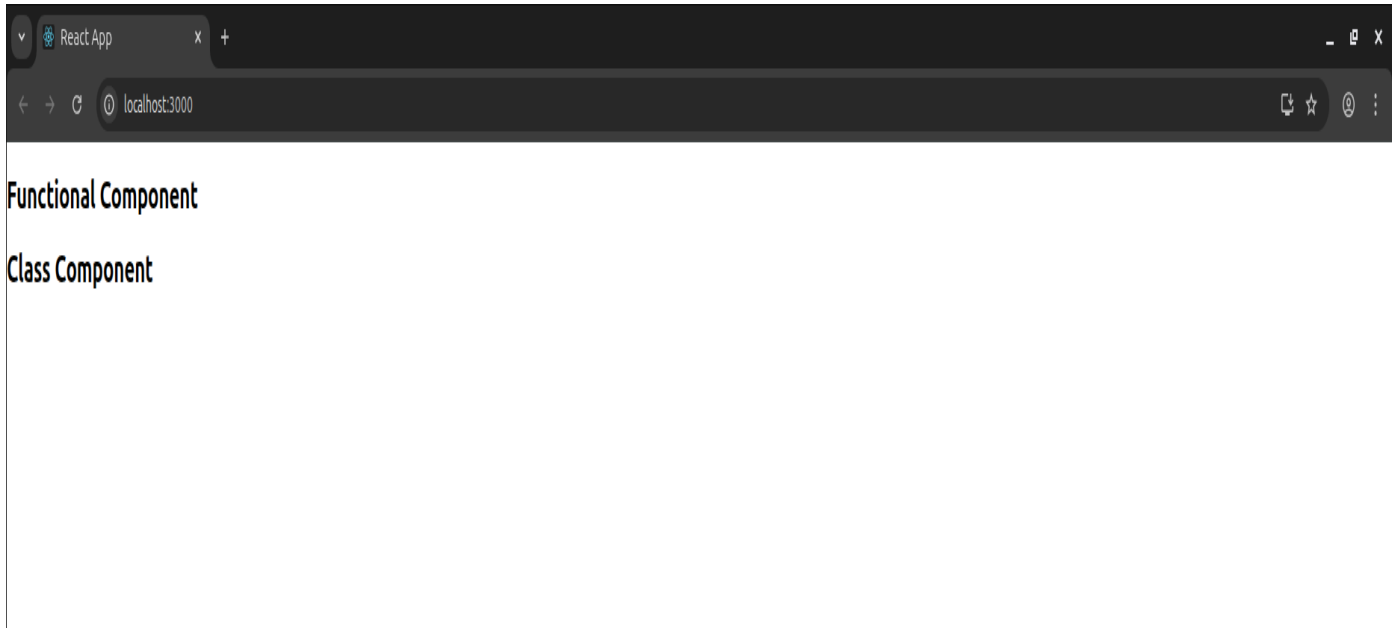

Functional Component:

```
exercise-1 > src > Q3-Functional.jsx > default
1  function FunctionalComponent(){
2    |    return <h2>Functional Component</h2>
3    |  }
4
5  export default FunctionalComponent;
```

Class Component:

```
exercise-1 > src > Q3-Class.jsx > default
1  import React from "react";
2
3  class ClassComponent extends React.Component{
4    |    render(){
5    |      |    return <h2>Class Component</h2>
6    |      |  }
7    |    }
8    |  }
9
10 export default ClassComponent;
```

React App:

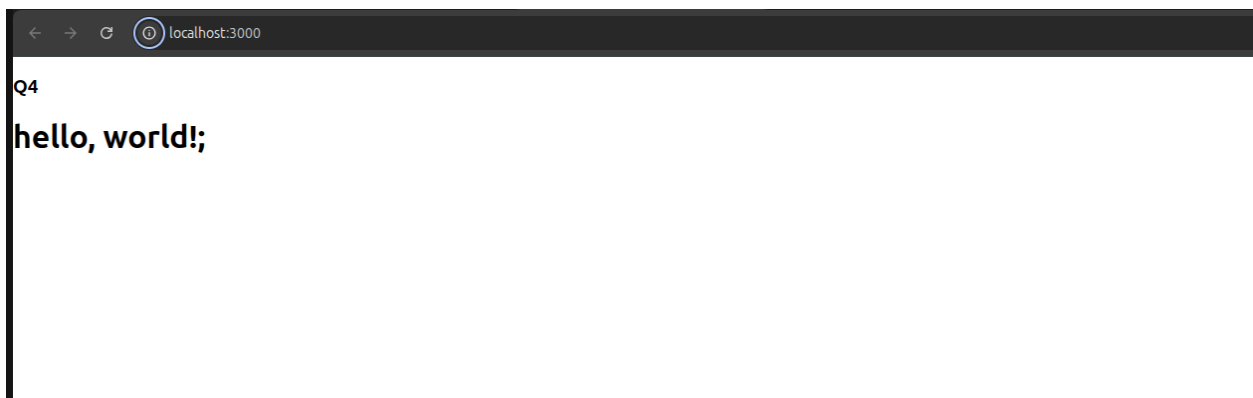

Q4)- Given the following code, identify the issue and fix it: `const element = <h1>Hello, World!;</h1>;`

Original code with issue :

```
exercise-1 > src > Q4.jsx > ...
1  function Fixed(){
2    const element= <h1>hello, world!;</h1>;
3    return element;
4  }
5
6  export default Fixed;
```

React App Displays:

Issue Explained: The issue here is that the semicolon(;) after hello,world!; is being treated as text and not as part of the syntax.

Below is the fixed code with the semicolon(;) after hello,world!; removed.

Fixed code after issue resolved:

```
exercise-1 > src > Q4.jsx > ...  
1  function Fixed(){  
2    const element= <h1>hello, world!</h1>;  
3    return element;  
4  }  
5  
6  export default Fixed;
```

React App Displays:
