

EXERCISE 3

Create Functions for CRUD Operations:

- a. **Create:** Implement a function to add a new student to the `students` table.
- b. **Read:** Implement a function to fetch all students from the table.
- c. **Update:** Implement a function to update a student's grade based on their `id`.
- d. **Delete:** Implement a function to delete a student by `id`.

- **Test the CRUD Operations:**

- a. Create a `main.js` file where you:
 - i. Add a student.
 - ii. Retrieve all students.
 - iii. Update a student's grade.
 - iv. Delete a student.

OUTPUT:

```
harsh-raj@TTNPL-harsh:Exercise_3 (node_assignment)$ node main.js
[dotenv@17.3.1] injecting env (5) from .env -- tip: ✂ run anywhere with `dotenvx run -- yourcommand`
Added: { id: 1, name: 'Harsh', grade: 'A' }
All Students: [ { id: 1, name: 'Harsh', grade: 'A' } ]
Updated: { id: 1, name: 'Harsh', grade: 'A+' }
[dotenv@17.3.1] injecting env (0) from .env -- tip: ⚙ override existing env vars with { override: true }
Deleted: { id: 1, name: 'Harsh', grade: 'A+' }
```
